Type of Maintenance	Equipment used	Cleaning products	Cleaning methods
Daily Maintenance			To do as needed
Manual cleaning		Neutral Cleaner	1- Sweep the surface 2-Wash with mop using cleaning solution 3-Rinse with clean water
OR			To do as needed
Auto-scrub	 3M™ 5000 3M™ 5100	Clean Water ¹ or Neutral Cleaner	1- Sweep the surface 2- Scrub with water or solution 3- Vacuum-up solution
Regular Maintenance			Once every 2 weeks
Auto-scrub	 3M™ 5000 3M™ 5100	Neutral Cleaner or Disinfectant ²	1- Sweep the surface 2- Scrub with solution 3- Vacuum-up solution 4- Rinse with clean water
Initial Cleaning and/or Periodic Deep Cleaning			Every 2 to 3 months
Auto-scrub	 3M™ 5000 3M™ 5100	Neutral or Alkaline Cleaner pH must not exceed 11	1- Sweep the surface 2- Scrub with solution (Turn-off vacuum) 3- Let solution dwell ± 5 minutes 4- Scrub again (Turn-on vacuum) 5- Rinse with clean water
Optional: Floor Finish Application			Every 2 to 3 months or as needed
Our floorings do not require any floor finishes. Still, should you decide to do so, your acrylic emulsion supplier must perform tests to ensure proper adhesion of the acrylic emulsion to the surface of the floor	 3M™ 5000 3M™ 5100	Neutral or Alkaline Cleaner pH must not exceed 11 & Emulsion finish	1- Thoroughly scrub the surface with solution 2- Rinse with clean water 3- Apply floor finish using a mop or applicator. 4- Mat finish is recommended over glossy 5- Multiple coats will be needed to obtain the desired result 6- Buff at will. 7- Spray buff system may then be used for daily maintenance.

¹Using clean water may not be efficient enough with some auto-scrubbers.

²In areas where disinfection is required (e.g. operating rooms, patient rooms, etc.) and since the effectiveness of these products last only 10-15 minutes, always rinse with clean water after the application of the disinfectant as per their manufacturer instructions.

NOTE: These instruction must be adapted to the site conditions and traffic patterns observed for the different areas where the flooring is installed.

- Never use cleaners with pH higher than 11.
- The application of a floor finish is not required.
- There are many different cleaning products on the market, they are not all equally effective.
- Grits and sand will act as sandpaper on the surface and will eventually scratch the flooring
