

Taraflex®: The Official Championship Court for NCAA® DI Volleyball

TARAFLEX®

The most demanding coaches, athletic directors and players trust Taraflex® Sports Flooring to provide the highest performing and safest permanent, semi-permanent and portable sports flooring in the market. Taraflex offers a range of courts with customizable options to meet the needs of your facility and team. Taraflex is the most recognized, specified and preferred sports surface in the world.

Safety & Performance

Taraflex provides the ultimate court surface for elite volleyball players who rapidly pivot, slide, dive and jump. Each Taraflex court includes patented Triple Action ProtecSol™ treatment that prevents injury while maintaining the highest level of performance. This unique surface treatment drastically reduces friction burns, yet provides perfect shoe grip for landing and pivoting.

Finding The Right Solution

Taraflex has been delivering the broadest range of products, colors and installation options for over 70 years. Portable, permanent, and semi-permanent systems feature numerous wood designs and solid colors that can be customized for the unique needs of each facility. Taraflex is the first sports flooring to integrate Advanced Digital Printing Technology into the manufacturing process.

Champions Play On Taraflex

Recruit the best athletes, keep them motivated and healthy, and win more championships. That's why coaches choose Taraflex. The FIVB selected Taraflex for the 1976 Olympic Games, and we've been at the past 12 consecutive Summer Olympics. Today, Taraflex is the home court for over 75 Division I facilities and is the Official Championship Court of the NCAA® Division I Men's and Women's Volleyball Championships.

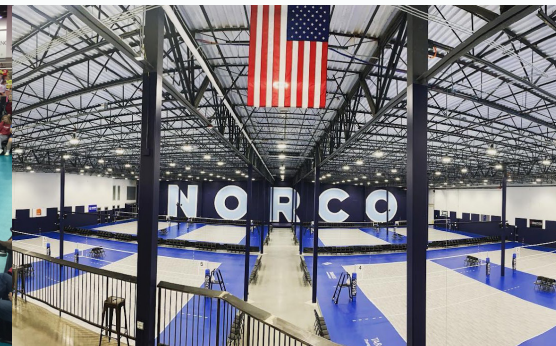

What do NCAA® National Championship coaches say about Taraflex?

"Taraflex is the best volleyball surface in the world! The padding makes diving, sliding and jumping easier on the player's bodies. It will help us keep our players safe and recruit elite level players into our program for years to come." John Cook - University of Nebraska

"Now we have more of a volleyball feel when you walk in the building. Players can slide on Taraflex, and there's cushion underneath, which is significant in our sport with all the landing and pounding on the floor." Craig Skinner - University of Kentucky

"Taraflex is the best volleyball surface we've ever played on. It is the safest court because it is forgiving on our player's bodies. Not only does it look great, but it's incredibly durable." David Shoji - Formerly University of Hawaii

SPORT M PLUS

- The most specified Taraflex court for collegiate main courts and club volleyball
- Dual-density foam provides CLASS 3 shock absorption (> 34%) for safety and long-term injury prevention
- Ideal for portable or permanent courts
