

# Solutions for Every Space in Healthcare

HEALTHCARE

**Gerflor**<sup>®</sup>

Gerflor expertise and experience in healthcare flooring is unparalleled in the industry. We have a wide range of products that will fit your flooring healthcare spaces, from ORs to ERs, to patient rooms, clinics, outpatient facilities, back-of-house and even lobbies.

### Experts in Healthcare

We focus on practical understanding of your various needs and actionable consultation on the solutions that will meet your safety, hygiene, maintenance and budgetary requirements.

### Evidence Based Design

The goal with all our solutions is to recognize measurable outcomes that meet the highest-priority requirements of your system in a sustainable way.

### Safe and Hygienic

Gerflor products are naturally bacterio- and viro-static, resisting the growth of harmful pathogens and disease. In addition, our integrated systems (wall & rounded clean corners) make maintenance and disinfection simpler and more cost-effective.

### FUN FACTS

- Gerflor invented homogeneous sheet vinyl in 1937
- Gerflor has over 3 million square feet of flooring installed in the single largest hospital project in North America
- The majority of Gerflor solutions are manufactured in company-owned facilities, including all heterogeneous and homogeneous flooring, linoleum and technical tiles

### HOMOGENEOUS/HETEROGENEOUS

- No wax for life means less full-time employee hours for daily maintenance
- Clean Corner System provides advanced cleaning capabilities, meeting all healthcare requirements
- Patented surface treatment technology provides stain and chemical resistance, leading to superior EVS and infection control outcomes
- Installation methods that can eliminate downtime

### LUXURY VINYL TILE

- Relevant visuals that contribute to biophilic environments
- Minimal VOC emissions contributing to improved health and wellness
- Protective wearlayer designed to stand up to high traffic
- PUR+ surface treatment provides easy maintenance

### TECHNICAL TILE

- Heavy duty solutions for back of house applications
- Unique solutions for installing over existing or challenging subfloors
- Modular product designed for monolithic visuals
- Features solutions that can reach higher levels of ISO Cleanliness standards and certifications than those found in typical healthcare environments
