

# Industry Flooring Solutions

INDUSTRY

**Gerflor®**

Gerflor has the expertise to manage the complex flooring applications of the life science, high tech and manufacturing industries. We design a broad range of flooring solutions to meet the demands for specialized technical applications. Our flooring has best in class chemical, stain and abrasion resistance. Most of our sheet flooring and tiles can be installed over existing flooring for fast, sustainable and cost-effective renovations.

### Focused on Health, Safety and Quality

Gerflor wall panels and flooring are FloorScore® certified, non-slip and resistant to scratching and abrasion. Our ESD products protect employees against electrical risks. Long lasting quality walls and floors are possible with these rot-proof, non-absorbent, watertight and non-porous product options.

### Controlling the Environment

Gerflor industry specialists bring expertise and real-world experiences to help your team meet the complex needs of life science, high tech, manufacturing and cleanroom environments. Our industry specialists understand your functional objectives and share their insight and problem-solving skills to help you achieve the optimal flooring and walls for your operations.

### Broad Range of Solutions

Our industry specialists approach your flooring and wall challenges with a wide range of solutions. Gerflor's depth of products address increasingly stringent requirements for labs, compounding pharmacies, fabrication plants, and testing or R&D facilities. Life science, high tech, manufacturing and cleanroom environments are our expertise, and we can provide the right solutions for you.

### FUN FACTS

- Over 2 million square feet of Gerflor flooring and wall protections installed
- In 2018, it is estimated that the life science industry contributed \$2.6 trillion to the U.S. economy
- Gerflor's Evercare surface treatment is a patented coating obtained by UV laser cross-linking

### TECHNICAL TILES

- Durability for heavy traffic areas
- Unique solutions for installation over existing floors with less subfloor preparation, allowing cleanrooms to remain functional during renovations
- Modular product design for monolithic visuals
- No wax for life surface treatment for reduced maintenance time and costs

### CONTROLLED AND LABORATORY ENVIRONMENT FLOORING

- ISO-certified solutions for cleanroom applications
- Resistance to chemicals and common damage in cleanrooms
- Clean corner and wall systems offer watertight coverage for cleanability
- Patented surface treatment technology with stain and chemical resistance

### ESD FLOORING

- ESD products are available in configurations of interlocking tiles, welded tiles, sheet goods and accessories
- Renovation solutions for little to no shut down
- Static control – low static electrical propensity, conductive flooring solution
- Gerflor flooring meets all US standards for conductive flooring
